Canadian Gothic

An affordable way to show how salvaged building materials can be useful. These Lath Frames will be beautiful in your home. These simple picture or mirror frames are made with salvaged wood lath from plaster wall construction of century-old homes. The lath is used to create a shadowbox-like frame ready to show off favorite photos or your latest sketch. The backing is a corrugated cardboard.

These frames come with wall hanging hardware. Please specify which orientation (i.e. landscape or portrait) preferred. Minimum order 10 frames.

Glass and photographs not included.
